-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is responsive to preliminary amendment filed 5/17/06.

Claims 1-20 are currently pending in this application.

Specification

2. The abstract of the disclosure is objected to because it should be in a separate page. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 and 5-18 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 101 09 489 (RAPID BIOMEDICAL).

DE 101 09 489 (RAPID BIOMEDICAL) discloses, see Figure drawings and claims a radio frequency coil for MRI that is the combination of a birdcage section with a TEM section. The RF coil sections cooperatively define a subject-receiving region. Note as shown in the drawings, how the TEM and birdcage sections are coupled to each other.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 101 09 489 (RAPID BIOMEDICAL) as applied to claims 1-2 and 5-18 above, and further in view of P.N. 4,594,566 (Maudsley).

The only difference between DE 101 09 489 (RAPID BIOMEDICAL) and the claims at issue is the transparent or translucent feature recited.

This difference would have been obvious to the artisan of ordinary skill in the art in view of Maudsley. Maudsley teaches at col. 7 that in coils for MRI it is desirable to provide an opening or similar feature to the effect of reducing a patient's claustrophobic feelings. To provide such translucent opening in DE 101 09 489 (RAPID BIOMEDICAL) would have been obvious to the artisan of ordinary skill in the art.

Allowable Subject Matter

7. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McKinnon et al. discloses a MRI coil. See entire document, which suggests a TEM/Birdcage hybrid.
